

Federal Healthcare Resilience Task Force

Alternate Care Site (ACS) Toolkit

First Edition

Product Purpose:

This Toolkit was developed to help state, local, tribal and territorial (SLTT) entities to address potential shortages in medical facilities during the 2020 COVID-19 pandemic. It is intended to provide technical assistance to SLTT entities in establishing and operationalizing Alternate Care Sites (ACS).

Intended Audience:

State, Local, Tribal, and Territorial Governments (**SLTTs**)

FEMA Regional Administrators

HHS Regional Administrators

HOW TO USE THIS TOOLKIT

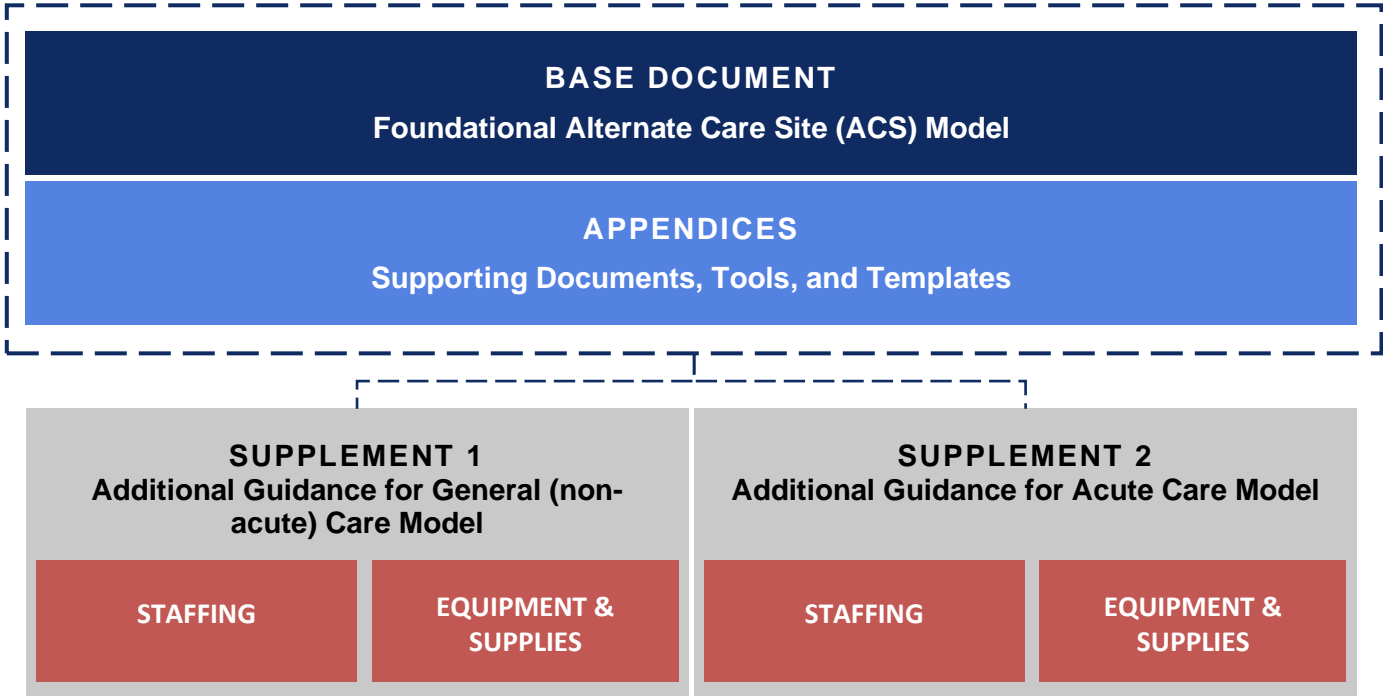

TABLE OF CONTENTS

1. Purpose and Scope	6
1.1 Concept.....	6

	Appendix I: Sample Wellness Check Form.....	46

Appendix J: Sample Site Photos	47
SUPPLEMENT 1: Additional Guidance for General (non-acute) Care ACS Model.	53
SUPPLEMENT 2: Additional Guidance for Acute Care ACS Model	101
Alternate Care Site Guide	133

1. PURPOSE AND SCOPE

This Alternate Care Site (ACS) Toolkit was developed by the U.S. Government to help state, local, tribal and territorial (SLTT) entities to address potential shortages in medical facilities during the 2020 COVID-19 pandemic. It should not be viewed as comprehensive and final. This Toolkit should be adapted and amended to accommodate the unique circumstances of each ACS. It was adapted from the HHS Federal Medical Station Concept of Operations. It is intended to provide technical assistance to SLTT entities in establishing and operationalizing alternate care sites.

This Toolkit provides a general blueprint for an ACS that could be used by other federal agencies, states, or local jurisdictions to establish a similar capability. This blueprint details the type and level of care provided, the various roles and responsibilities of the necessary personnel, and the development, operation and demobilization of the ACS. Supporting documents for the foundational ACS model may be found in appendices to this document.

With modification, the basic foundation of the ACS could be enhanced or otherwise modified to serve as:

1. **General (non-acute) Care:** General, low-level care for mildly to moderately symptomatic COVID-19 patients. This includes patients that may need oxygen (less than or equal to 2L/min), who do not require extensive nursing care, and who can generally move about on their own.
2. **Acute Care:** Higher acuity care for COVID-19 patients. This level includes critical care, emergency care, and advanced cardiovascular life support (ACLS).

Additional guidance for the staffing and equipping of each of these specific models can be found in the supplements.

1.1 Concept

ACS are structures of opportunity created to provide a safe and comfortable setting where patients can be isolated and monitored during the COVID-19 pandemic. The safety of patients, care providers, and the general public is the main priority.

ACS are located in hotels, National Guard armories, gymnasiums, civic sports centers, schools, health clubs (only if equipment can be moved/removed), convention centers, and community centers dormitories, ships, etc. within close proximity to hospital systems. These buildings make ideal structures of opportunity for the ACS mission for a number of reasons. For example, these structures have the ability to house patients individually and have scalable room capacity to support an increase of patients, as necessary. Some also have the potential for individual heating, ventilation, and air-conditioning (HVAC) units, which can limit the spread of the virus between rooms.

The life cycle of the typical ACS begins with identification and establishment of the site by federal, state, or local personnel in conjunction with the state public health and medical authority over 48-72 hours. Once a site is established, staff and services can be supplemented by contractors, allowing for withdrawal of federal or state medical and law enforcement assets to leave behind just a sentinel onsite team.

1.2 ACS Decision Framework

The decision to incorporate an ACS into the COVID-19 response is one part of a multi-modal strategy. The decision framework below provides suggested guidance on whether to utilize an ACS and which type (General (non-acute) Care or Acute Care model) will best meet the needs of the healthcare system.

1.2.1 Can your healthcare system benefit from an ACS?

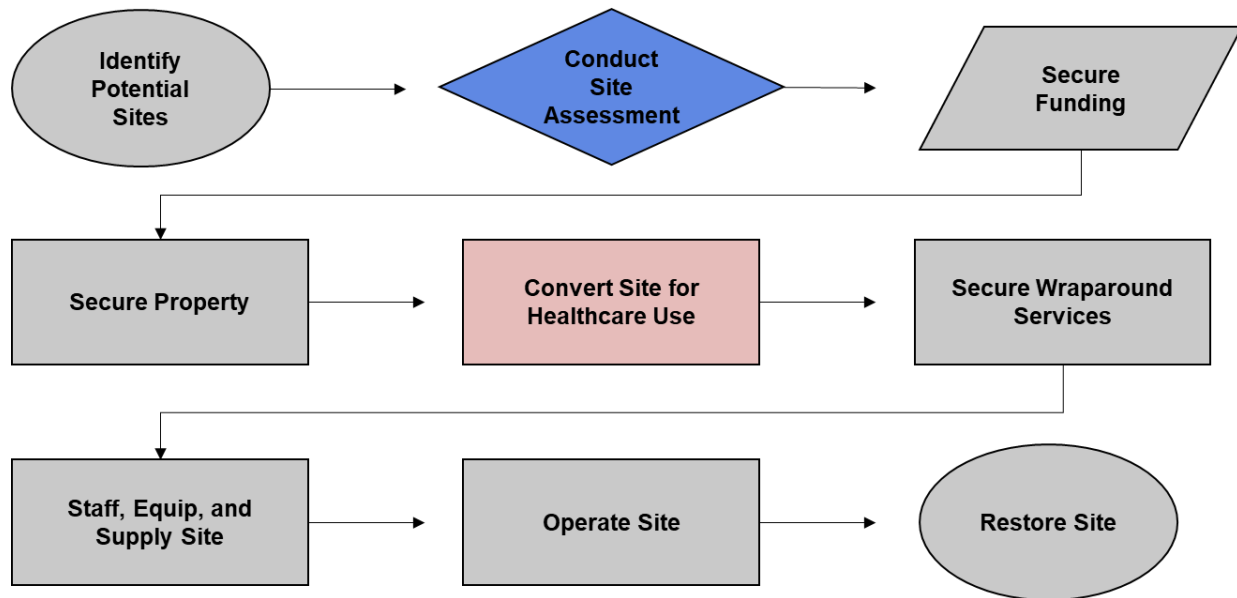

Your healthcare system should consider establishing an ACS if you answer “yes” to any or all of the following questions:

- Does your jurisdiction or healthcare system have an anticipated or current *need* for additional surge capacity or capability?
- Does your jurisdiction or healthcare system has *ability to support* additional non-traditional facilities as part of the healthcare system?
- Does your jurisdiction or healthcare system have *ability to staff* an additional healthcare site using traditional or non-traditional medical providers?

1.2.2 Which ACS model would best meet the needs of your location?

General (non-acute) Care Model	Acute Care Model
Capacity building (increase beds)	Capability building (increase ventilators)
Requires minimal structural alteration	Requires significant structural alteration
Lower cost	Higher cost
Operational in 72 hours	Operational > 72 hours
Basic level care	Advanced level care
ED/Mid-level Providers	ICU/Critical Care Providers
Designed for minimal acuity patients requiring minimal activities of daily living (ADLs) support (e.g. COVID-positive with minimal symptoms or require <2L of oxygen)	Designed for higher acuity patients requiring closer monitoring or respiratory support (e.g. COVID-positive with pneumonia or respiratory distress requiring ventilator support)

1.3 ACS Process Flowchart

2. PROCEDURES

2.1 Identify Potential Sites

The following section outlines the broad recommended steps to establish an ACS footprint. See Appendix B: Alternate Care Site Checklist.

2.2 Conduct Site Assessment

2.2.1 Physical Considerations

- Comply with the Architectural Barriers Act and Americans with Disabilities Act
- Should not be in the Special Flood Hazard Area (SFHA), but acknowledges that there may not be a practical location outside of the floodplain
- Must be capable of being adequately secured on perimeter
- Should not have structural issues or be in a state of unsafe disrepair
- Identify location for aeromedical transport if available/needed
- Should have a fire sprinkler system
 - If not, must conduct additional monitoring in accordance with local fire jurisdiction
- Should have elevator access for patients, if the building is more than one floor
- Should have a designated secure ambulation/exercise area for patients
- Should have a functional kitchen
- Should have bathrooms in each room
- Should have an individual HVAC in each room

2.2.2 Logistical Considerations

- Should be otherwise vacant of patrons

- Should allow for photocopier and printer setup
- Should be able to accommodate a tent or other structural barrier for ambulance arrival at entrance to protect patients' privacy from photography/drones
 - Consider researching local drone laws during site assessment
- Should allow for the separation of patients who are persons under investigation (PUI) and those that have tested positive for COVID-19
- Should have a dedicated space for a 24/7 dispatch center with one dedicated phone number
- Should have separate areas for donning and doffing PPE
- Should be able to accommodate a team staging area at least 12 feet away from patients (e.g., hotel lobby)
- Should have an arrival and disinfecting/cleaning area for EMS

2.2.3 Operational Considerations

- Obtain building engineer contact information
- Walk site with building manager and engineer to understand key systems in the building and emergency procedures for each such as water, power, phone, internet for patients, and fire suppression systems
- Work with the local Fire Marshal to identify fire exits and ensure site floor plan is in step with evacuation plans as they are developed
- Walk through rooms to ensure clean linen, towels, refrigerators, etc. and identify what is already at the site and what will be provided by the wraparound service contractor
- Develop map layout of site with bed types, suite types, Americans with Disabilities Act-compliant (ADA-compliant) rooms, and adjoining rooms for family units
- Identify closed-circuit television (CCTV) systems in building and make sure that they are disabled with no way of reactivating them remotely
- Make sure cable and internet work on patient floors
- Understand site key system
 - Master keys for room access (need more than one for teams)
 - Keys made and labeled for all rooms to facilitate patient arrival and room check-in
 - Knowledge of how to make additional keys, including emergency override keys
- Find keys to lock out elevators to the lobby so patients do not show up in the lobby unannounced
- Close off all public bathrooms in anticipated patient areas due to infection control concerns
- Clean out any food in common areas
- If applicable, ensure pool area is secured or blocked off

2.2.4 Infection Prevention and Control Considerations

Consideration should be given to conducting surveillance for potentially transmissible infectious diseases (e.g., Infectious diarrhea) to ensure clusters are detected early and addressed.

For additional information on infection prevention and control consideration refer to the CDC website for the latest infection prevention and control recommendations at: <https://www.cdc.gov/coronavirus/2019-ncov/hcp/index.html>, including infection control considerations for ACS at: <https://www.cdc.gov/coronavirus/2019-ncov/healthcare-facilities/alternative-care-sites.html>

2.2.5 Pharmaceutical Considerations

All medical supplies should be stored in a secure, climate controlled area in close proximity to the patient treatment area. Most pharmaceuticals are labeled with storage temperatures. United States Pharmacopeia (USP) defines the various temperatures as:

- Controlled room temperature: 59 to 86 degrees Fahrenheit (F) or 15 to 30 degrees Celsius (C)
- Refrigerator: 36 to 46 degrees (F) or 2 to 8 degrees (C)
- Freezer: 32 degrees (F) and lower or 0 degrees (C) and lower

Pharmaceuticals that are stored at other than USP standard temperatures are considered to be "adulterated" and therefore unsuitable for human use. It is the responsibility of the SLTT to ensure that the cold chain storage is completed from deployment to arrival on scene. It is the responsibility of the Logistics section to ensure that the cold chain storage is maintained from that point forward.

2.3 Secure Funding

Funding is generally secured after specific sites are identified. The ACS may be funded by the State or local government or may be funded by FEMA through the State and local government under a Direct Federal Assistance (DFA) (cost shared) mission assignment based on FEMA-State agreement.

2.4 Secure Property

States often identify property that they already own. If not, they are responsible for securing the property through an agreement or lease. If the State will be receiving Federal Assistance, they must provide the lands, easements, and rights of way necessary to accomplish any approved modifications to the property.

2.5 Convert Site for Healthcare Use

If site modifications are required to convert it for medical use, prepare a design and issue a contract for this work.

Alternately, FEMA may provide a mission assignment to have USACE issue the contract and manage the work.

2.6 Secure Wraparound Services

The ACS setup process requires an orderly approach to ensure that the site footprint is properly configured for safe occupancy. It is important to adapt these basic principles to the realities of the specific site chosen. See Appendix C: Wraparound Services Checklist and Appendix D: Sample ACS Schematic.

Critical actions include:

- Obtain Wraparound services Contract. See Appendix E: Sample Statement of Work for Wraparound Services
- Ensure fencing is installed around perimeter to enforce the isolation and prevent unauthorized access to the site
- Ensure the site is secured with onsite guard force
- Establish the appropriate number of fire-compliant access points to the site depending on local regulations
- Establish a separate staging/ingress/egress point for patients and EMS
- Establish a separate ingress/egress point for staff
- Determine safe evacuation routes with designated rally point
- Establish Command Post/Administrative Area in Lobby or other suitable location.
- Delineate between Hot Zone/Operational Area and Clean/Support Area
 - Clearly mark with signage
 - Clearly designate Clean/Support Areas for both staff staging and PPE donning
 - Clearly identify Transition Area for PPE doffing
 - Clearly identify Hot Zone/Living Quarters in individual rooms for patients
- Designate separate floors for COVID-19-positive and COVID-19-negative/unknown patients
- Conduct safe isolation practices in common areas, stairwells, and elevators
- Utilize plastic dividers to effectively demarcate and reinforce site footprint
- Establish designated media area

2.7 Staff, Equip, and Supply Site

Based on initial analysis of healthcare system need, select the staffing and equipment configuration for the site as either a General (non-acute) Care ACS Model or Acute Care ACS Model.

Refer to Supplement 1 for General (non-acute) Care ACS Model and Supplement 2 for Acute Care ACS Model.

2.8 Operate Site

ACS management focuses on the operation of a safe and comfortable setting where patients can be isolated and monitored during the COVID-19 pandemic. Ensure that all onsite staff are provided with proper oversight and supervision. Ensure that patients under quarantine/isolation orders (and release criteria) is based on most current CDC guidance.

ACS assets should be capable of rapid integration into and interoperability within the community's existing healthcare infrastructure. As such, ACS operations should be deliberate and synchronized for maximum efficiency and effectiveness. Linkage of the site to the adjacent healthcare system should include a communications networking strategy and telemedicine options. From the selection of an ACS site to contracting logistical site support requirements, every effort should be made to rapidly achieve operational capability and effective integration and interoperability. All applicable SLTT jurisdiction statutory, regulatory, and related authorities, policies and other governing documents should be observed. If they compete, the ACS Site

Manager in coordination with SLTT governments should consult with their legal counsel to determine how to proceed.

2.8.1 Roles and Responsibilities

ACS site setup requires a variety of staff, services, and supplies along parallel lines of effort. These lines of effort include site oversight, site security, wraparound support, EMS transport, site safety evaluation, onsite medical care, public information messaging, patient/patient support, personal protective equipment (PPE), and case management. The steps below focus on a general model as blueprint for the establishment of an ACS site. All personnel involved with ACS facilities should be housed offsite, not at the site.

2.8.1.1 Site Manager

The ACS Site Manager serves as the site administrator and oversees site selection, setup, operations, and breakdown. It is critical for the Site Manager to be able to see the site through safety, security, medical, and logistical lenses. The responsibilities of the Site Manager include but are not limited to the following:

- Work with various points of contact to coordinate support capabilities;
- Develop site footprint;
- Coordinate with local health department, as needed;
- Establish face-to-face coordination with the Public Information Officer (PIO) during site setup;
- Ensure PIO is aware of patient/site status;
- Provide statements to press when necessary, ensuring appropriate privacy requirements are followed;
- Establish an Incident Management Team (IMT) structure for operations and connect at least twice a day with Operations, Logistics, and Command staff;
- Triage information to send to lead agency;
- Maintain site for duration of activation; and
- Provide and retain notification to patients of quarantine/isolation orders signed, and make copies for onsite security personnel;
- Ensure appropriate reporting and records management requirements are met.

2.8.1.2 Law Enforcement

A strong law enforcement presence is critical to initial setup of an ACS. Law enforcement officers (LEO) will help to guide a contract guard force, if one is present. The responsibilities of law enforcement at an ACS include but are not limited to the following:

- Perform site security assessment of site;
- Determine security needs of site in conjunction with local jurisdictions;
- Determine if site can be adequately secured for operations;
- Provide initial security footprint at site to Site Manager;
- Work with Medical Team, ambulance services, and local healthcare systems to determine routes to and from a hospital;
- Run hospital transport route with ambulance and security; and
- Coordinate and oversee contract guard force once in place.

2.8.1.3 Safety Officer

The ACS Safety Officer should work closely with local safety officials, such as the Fire Marshal, during site assessment and setup. A close working relationship with the Fire Marshal will help the Safety Officer ensure all evacuation plans are in line with local requirements to ensure patient and responder safety. Safety Officers must have knowledge of infection control practices.

The Safety Officer should work with the Fire Marshal on fencing issues that could impact fire department response plans as well as with the building engineer to ensure that the donning and doffing locations for PPE use two different ventilation systems to protect the health of all personnel. The responsibilities for the Safety Officer include but are not limited to the following:

- Develop plan for workplace exposures and illness among healthcare providers;
- Develop plan for the evacuation and relocation of non-acute patients and the need for shelter in place or specialize evacuation and relocation of acute care patients;
- V stands for velocity zone – high risk high hazard during a flooding event. Honestly sites in these kinds of zones should be working closely with the local hospital/care facilities because they will certainly have evacuation plans (thinking some of the Parishes in Louisiana, for example, where much of the land is in V zones...)
- Consider plan for potential future risks (hurricanes, etc.) including how to handle different types of patients;
- Conduct early assessment of site with local Public Safety Agencies (e.g., Fire, EMS, Police) and maintain ongoing liaison role;
- Assess final risk category for site;
- Monitor CDC guidance on the most up-to-date guidance for infection control;
- Implement blueprint for infection control protocols;
- Implement appropriate guidance for isolation;
- Maintain safe practices onsite and site evacuation plan; and
- Demonstrate appropriate knowledge/use of PPE, including donning and doffing procedures;
- Screen for required PPE; and
- Oversee fit testing, as needed.

2.8.1.4 Chief Medical Officer

The Chief Medical Officer (CMO) manages the medical oversight of the medical team, support personnel and patients. The ideal CMO would be a current medical practitioner with emergency care experience. The responsibilities of the CMO include but are not limited to the following:

- Monitor medical conditions of support personnel and patients;
- Monitor health of onsite team; and
- Review medical documentation for site.

2.8.1.5 Public Health Representative

The Public Health Representative works closely with the Site Manager and the CMO to help facilitate a smooth patient experience while maintaining the security and overall health of the

site and personnel inside. The responsibilities for the Public Health Representative include but are not limited to the following:

- Keep security personnel and the medical team updated on the arrival or departure of patients and the type of transportation being used;
- Perform isolation standards inspection;
- Confirm site is conforming to latest quarantine/isolation guidance;
- Provide updates to Site Manager and CMO on when to expect incoming patients; and
- Ensure no gross violations of general sequestering protocol.

2.8.1.6 Wraparound Services Contractor

Due to the variation of contract requirements, wraparound services will differ at each ACS. Successful wraparound services will ensure patients are satisfied with their services and will be willing to adapt their processes and protocols to ensure successful execution of their contract. Potential responsibilities for wraparound services include but are not limited to the following:

- Linen and laundry service;
- Food preparation and delivery;
- Fencing;
- Contract security guards;
- Professional cleaning for each room after use;
- Porta-potties;
- Hand-washing stations; and
- Waste (to include medical waste and sharps) and garbage removal.

2.8.1.7 Medical Team

The medical team plays a crucial role in the execution of an ACS and may differ in structure depending on the state or locality setting it up and the medical mission of the ACS. However, all medical teams will provide a similar role for patient care. The medical team at an ACS will need to incorporate certain unique duties due to the COVID-19 situation. Responsibilities include:

- Follow patient monitoring protocol (e.g., take temperature of patient twice a day)
- Provide medical monitoring
- Perform intake/screening
- Deliver food to patients
- Assess patients
- Emergency medical response in the isolation zone
- Identify medical gear to be placed in the isolation zone
- Set up crash cart capability in the isolation zone
- Monitor chronic conditions
- Procure medication refills
- Deliver required care
- Deal with initial acute decompensation of patients
- Request ambulance transfer, if needed
- Assist with transfer of patients to ambulance
- Work with security team to create transport plan in case of decompensation

- Deliver food and packages to patients

2.8.1.8 Logistics and Administrative Staff

Logistics and administrative staff provide necessary 24/7 coverage for patients and medical personnel. They maintain constant contact with patients and resolve any non-medical requests that come up during patient care. They provide essential “front desk” services that are typically found in hotels. They also provide crucial communication between medical and non-medical staff and work to setup the ACS with the Site Manager to ensure smooth operations.

Responsibilities include but are not limited to the following:

- Maintain Virtual Town Hall for patient updates;
- Staff a Dispatch Center including the switchboard, daily screening, and all incoming calls and requests;
- Deliver services directly to rooms (e.g., meals, prescription refills, online order deliveries, additional towels, blankets, pillows, etc.);
- Supply over-the-counter medications for patients (e.g., acetaminophen, ibuprofen, cough syrup, cough drops, etc.) with medical team permission; and
- Setup internet services if site cannot provide internet.

2.8.1.9 Ambulance Services

Ambulance services provide additional emergency response capabilities for the medical team to respond to medical emergencies and transport patients to and from the hospital. Ambulance service providers should work with the Site Manager, Law Enforcement, the Safety Officer, and the Medical Team to determine PPE needs, security transport requirements, and practice transport routes to the nearest medical facilities. If local EMS services are unable to meet the need, consider contracting with a private ALS EMS provider for dedicated services. Ambulance services responsibilities include but are not limited to the following:

- Provide onsite ambulance for emergency transport;
- Identify closest definitive care site;
- Establish a location/capability for air transport, if needed;
- Provide reliable transportation of patients to hospital when needed; and
- Practice transport routes to hospital with security team.

2.8.1.10 Personal Protective Equipment (PPE) Coordinator

For ACS sites dealing with COVID-19 or other infectious disease, all personnel working at the site should be trained and competent on the use of all PPE. Personnel should be fit-tested as part of respiratory protection program for N95 respirators. The PPE Coordinator will serve as the lead in ensuring that staff are appropriately trained on the indications and use of PPE and should audit donning and doffing of PPE to ensure it is being done correctly. They should also define PPE requirements for specific parts of the facility, and will determine any changes in PPE requirements over the mission. The same PPE Coordinator can also perform this function for contract staff. Responsibilities include but are not limited to the following:

- Determine required PPE for unique site demographics;
- Coordinate with the CMO for any required medical screening of personnel prior to usage of PPE;

- Acquire PPE; and
- Fit test and certify all site personnel, including contracting staff.

2.8.1.11 Public Affairs/Information Officer

The Public Affairs Officer/Public Information Officer (PAO/PIO) is a critical role to provide communication on the ACS to command staff, local PIOs, and the public, as needed. Each command structure will have its own preference for notification of the PAO/PIO through the command staff, but the establishment of the position is necessary for a public-serving site like an ACS. Responsibilities include but are not limited to the following:

- Provide messaging for site to command staff, local PIOs, media, and the public, as needed;
- Handle onsite press arrivals and coordinate with local jurisdictions, as needed; and
- Interact with state and local jurisdictions regarding coordination of site.

2.8.1.12 Case Management Team

The Case Management Team acts as a liaison between patients, medical staff, non-medical staff, command staff, and families. They provide crucial services to ensure patients have the resources they need, are comfortable, and have their needs addressed in a timely manner. The team also provides support, including mental health, to responders. Their responsibilities include but are not limited to the following:

- Help organize patient transport once released;
- Assist with family connections to facilitate transport home;
- Staff an additional behavioral health specialist to monitor personnel at site; and
- Staff a hotline phone at the front desk to liaise with patient requests.

2.8.2 Site Flow Plan

- Develop Site Emergency Plans for key contingencies, such as:
 - Fire Safety Plan. See Appendix F: Sample Fire Safety Plan
 - Medical decompensation of a patient requiring emergency care and transport
 - Compromised staff PPE and exposure requiring decontamination
 - Emergency evacuation from the site to designated rally point (e.g. fires)
 - Running routes from site to local hospital for medical transports
 - Panic button protocol for patients (in the event of a fall, acute needs, etc.)
- Ensure all personnel and practices are consistent with CDC guidance on PPE
 - Calculate on an ongoing basis the PPE to care for **(# of pts) x (# of days)**
 - CDC PPE calculator is available at:
<https://www.cdc.gov/coronavirus/2019-ncov/hcp/ppe-strategy/burn-calculator.html>
 - Ensure all personnel are fit-tested for PPE including law enforcement/guard presence
 - Ensure that assigned personnel are provided appropriate PPE and training in proper use
- Ensure communication linkage to receive advance pre-arrival notification of individuals to site
 - Coordinate with EMS Dispatch

- Coordinate with discharging hospitals
- Ensure coordinated site access control plan
 - Consider using identification tags, colored tape, or colored wristbands for approved personnel allowed onsite
 - Set up fencing around perimeter
 - Stand up pop-up tents for privacy in key areas (e.g. ambulance arrival)
 - Establish onsite security/law enforcement presence
- Ensure clear medical reception plan to receive patients in ambulance staging
- Post Triage Flow Poster for staff; sample triage flow language can include the following:
 - Greet and welcome patient
 - Apply identification bracelet
 - Identify name, cell phone number, date of birth, home origin, country, state, and veteran status (if applicable)
 - Medical history:
 - Current history of present symptoms including: cough, fever, head or body aches, chest pains
 - Current medications including: last dose taken, need for refills, availability of medication, allergies, smoking status, date and location of COVID-19 testing, date of leaving last location
 - Obtain temperature and, if appropriate, SpO₂ and heart rate
 - Document any dietary restrictions
 - Assign patient a room based on testing results
 - Instruct patient on how to reach front desk
 - Review room restrictions and fresh air plan
 - Provide patient instructions handout
 - Escort patient to room with belongings
 - Disinfect equipment, chair, table, and any touched surface including: staircase, railings, and elevator if used
- Complete Patient Intake Form. See Appendix G: Patient Intake Form
- Distribute standardized Patient Instructions. See Appendix H: Sample Patient Instructions
- Ensure clear path of patient movement through the site from arrival to room placement
- Ensure onsite communication net to control different parts of the operation (e.g., radios)
- Conduct a daily Virtual Town Hall to keep patients apprised of site status
- Designate an area for patients to spend time outside of their rooms while preserving isolation practices
 - Consider outdoor patios, courtyards, etc.
- Develop combined protocol to coordinate food delivery and conduct Daily Wellness Checks, based on keeping patients isolated in their individual rooms. See Appendix I: Sample Wellness Check Form
 - Temperature checks with no-touch thermometers
 - Patient food delivery 3 times/day with ability to modify for dietary and religious needs
- Coordinate with Swab Teams to laboratory-test patients as indicated
- Coordinate with Site Manager and Case Managers for patient disposition needs

2.8.3 Site Security Plan

- Obtain local/federal law enforcement support (dependent on state/federal quarantine or isolation)
- Coordinate with federal, state and local law enforcement in the operational area
 - Meet with the law enforcement shift supervisor every day
 - Discuss arrest and disturbance procedures with law enforcement supervisor in conjunction with the security lead
 - Develop procedures for investigation of suspicious activity at the site
 - Obtain mechanisms to channel intelligence regarding threats to the operation
 - Plan on how LEOs will respond to low to mid-level policing requests at the site
 - Allow onsite LEOs to mitigate the immediate threats and allow full investigations to take place afterwards
 - Coordinate with local law enforcement PIO to manage local media arriving on scene
- Coordinate with local fire department/EMS department(s) in the operational area
 - Meet with fire department chief officer when establishing the ACS
 - Meet with local Fire Marshal as needed
 - Conduct a site walkthrough with the local fire crew to go over internal procedures and to understand the fire/EMS procedures in the event of a fire or emergency
 - If local EMS services are unable to meet the need, consider contracting with a private ALS EMS provider for dedicated services
 - Coordinate with a senior official representing the EMS vendor and any hospital affiliations
- Perform Site Security Assessment
- Develop an Operations Plan
 - Relay site specific security requirements to medical team
 - Provide PPE for LEOs based on guidance by CDC
 - Review use of force issues
 - Verify scope of authority
 - Establish communications systems (e.g. onsite radios)
 - Ensure fencing/barriers
 - Maintain the integrity of fences and barriers
- Work with contractor regarding private security requirements
 - PPE fit testing
 - Armed vs. less lethal
 - Ability to expand numbers to accommodate hospital details
- Integrate security into the Unified Command for site
- Coordinate with the Safety Officer for the responding medical team
 - Participate in evacuation planning
 - Understand routine LEO response and fire/EMS response procedures

Figure 1: Sample Site Security Map

- Work with the CDC or Health Department to verify proper legal documentation is maintained

2.8.4 Site Communications Plan

Communication flow and accurate information are critical to effective decision-making. A standardized framework for communications that is capable of ensuring continuous and uninterrupted communications is critical. It is based on the concepts of interoperability, reliability, scalability, portability, and addresses the need for resiliency and redundancy of communications and information systems. Plain language and common terminology should be used. Codes should not be used, and all communications should be confined to essential messages. Use of acronyms should be limited and clarified for safety. Communications equipment should be issued by the SLTT Logistics. Both equipment and protocols are subject to change based upon technological advances, emerging operational requirements, and lessons learned. Communications systems should be:

- Interoperable: able to communicate within and across agencies and jurisdictions as required;
- Reliable: able to function in the context of any kind of emergency;
- Portable: built on standardized radio technologies, protocols, and frequencies;
- Scalable: suitable for use on a small or large scale as the needs of the incident dictate;
- Resilient: able to perform despite damaged or lost infrastructure; and
- Redundant: able to use alternate communications methods when primary systems go out.

2.8.5 On-site Plan for Caregivers and Family Members

During displacement due to catastrophic incidents, some patients may present to an ACS along with their home healthcare provider or other caregiver(s). Family members may want to remain together, especially if one member has a need for medical care or treatment.

Policies on family members residing in the ACS with a patient vary by state and should be considered and incorporated into ACS planning.

2.9 Restore Site

Once established, ACS will maintain continuous operations. Endpoint for the site is appropriate disposition of all patients from isolation protocol. The onsite team will maintain the site until site is deactivated or the responsibility is turned over to another appropriate authority. The site will require standard decontamination cleaning in accordance with CDC guidelines prior to turning it back over.

3. REPORTING AND RECORDS MANAGEMENT REQUIREMENTS

3.1.1 Reporting Requirements

Upon achieving initial operating capability (IOC) and throughout the duration of operations, each ACS should provide reports to the SLTT to inform the Common Operating Picture (COP).

Reporting recommendations include details regarding ACS response and recovery activities, at a minimum:

- Number of ACS beds (and cots) occupied;
- Number of ACS beds (and cots) available;
- Number of non-medical attendants (family members or caregivers who are not patients);
- The types of patients being cared for and common disease states encountered;
- Existing or anticipated issues relating to personnel, security, logistics sustainment, or operational capabilities (e.g., personnel, the ACS site or wrap-around services, etc.) other than those already identified/submitted for resolution.

3.1.2 Medical Record Requirements

Electronic Medical Records (EMR) may be used at ACS locations. The records maintained by this system and application should adhere to guidelines, applicable legal authorities, and guidance governing the routine collection, use, and storage of personal and patient related data.

Paper medical records may be used as an alternative and should adhere to the same applicable legal authorities and guidance governing the routine collection, use, and storage, of personal information.

4. CONTACT INFORMATION FOR TECHNICAL INQUIRIES AND LESSONS LEARNED

- All SLTT entities are encouraged to modify all information contain in this Toolkit to meet the needs of each entity.
- For technical inquiries, please contact your HHS Regional Emergency Coordinators or FEMA Regional Administrators.

Additional information and downloadable tools can be found online at:

<https://www.usace.army.mil/Coronavirus/Alternate-Care-Sites/>

APPENDIX D: SAMPLE ACS SCHEMATIC

APPENDIX E: SAMPLE STATEMENT OF WORK FOR WRAPAROUND SERVICES

This sample SOW is being sent to all field operations to give everyone visibility on what services we have been providing through XXX. **Your site may vary by specification, counts, start and end dates, etc.**

Emergency Response Service Support (ERSS)

Statement of Work (SOW)

Task Order SAMPLE ONLY Mod N/A

1.0 INTRODUCTION

The contractor shall provide the following services under the Emergency Response Service Support (ERSS) contract to support the Department of Health and Human Services (DHHS)/Assistant Secretary for Preparedness and Response (ASPR). The services will be for meals, laundry transportation and rooms for up to **120 people for up to 20 days** at location listed below (1.2). See section 1.2 below for the dates of services. Demobilization will occur on the day following the last day of service.

1.1 Services: All services required by site shall be provided as noted below in (1.2) and final cleaning and demobilization will occur on the day following the last day of service (see chart below for dates of service). Services may include: delivery to each room with individually wrapped catered meals and beverages (see 2.0 chart); transportation to/from the lodging to airport (see 2.2 chart); ALS and/or BLS Ambulance service may be requested to reside on site to transport ill patients to designated medical site/s or airport (see 2.3 chart); perimeter fencing, lighting and barriers (see 2.7 chart); facilities management (see 2.9 chart); laundry pickup from each room and delivery laundry services to each room to include linen exchange (see 2.6 chart); custodial services (see 2.4 chart); biomedical waste removal (see 2.5 & 2.8 charts); and HVAC with generator power and equipment fueling/serving as defined in 2.11 (see 2.11 chart).

1.2 Support Locations:

Name/Location	Support Dates

2.0 REQUIREMENTS

2.1 Catered Meals and Beverages: (PARA 19.3/19.6)

- 2.1.1 The Contractor shall provide drinking water: Bottled water should be provided with every meal (breakfast, lunch and dinner) (PARA 19.6.1b{4}) of this TO SOW. Additional bottled water shall be provided to ensure each person is provided a minimum of 2 liters per day.
- 2.1.2 The Contractor shall provide meals: Hot meals three times per day (breakfast, lunch, dinner **and daily snack, coffee bar**) delivered to lodging location and specifically to each room in (TO SOW Paragraph 1.2). Meals shall be nutritionally balanced and varied daily with servings of meat, vegetables, and starches. Meals Times: Breakfast: 08:00 AM, Lunch: 12:00 PM, Dinner: 6:00 PM. Any dieting or dietary restrictions shall be conveyed per site. On the final day lunch may be required at an earlier time and a bag lunch maybe required. Dinner may or may not be needed for the final day.

Name/Location	Meal Type	Quantity

2.2 Transportation: The Contractor shall provide vehicle transportation as noted in chart below to lodging locations (TO SOW Paragraph 1.2) and designated international airport provided by ASPR onsite or regional representative. (PARA 19.15). The contractor shall provide baggage handling support (staffing & equipment) in moving passenger baggage as noted in the chart below (PARA 19.15).

Buses will be utilized for transportation of travelers from XXX to local billeting and or airport locations. Stage all buses at or near the location listed above for the potential moves as directed by the Deputy Federal Health Coordinating Officer (DFHCO).

Name/Location	Vehicle Type	Quantity	Date/s	Start Time	End Time
Holiday Inn Express	15-PAX Shuttle Van	0			
	30-PAX Minibus	0			
	56-PAX Coach	0			
	Other	0			

Baggage handlers will provide the offloading of baggage from the cruise ship and uploading of baggage to either busses or airplanes. At locations XXX the baggage handlers will provide the unloading of baggage from the airplane, transport from airfield to the billeting location, and offloading of baggage at billeting location. See chart below for details by site.

Name/Location	Number of Passengers	Quantity of Planes	Quantity of Luggage	Start Time	End Time
Holiday Inn Express	0				

2.3 Ambulance: Location, Quantity, Types, Schedules noted in chart below.

- 2.3.1 Be equipped to transport patients exhibiting symptoms related to Coronavirus.
- 2.3.2 Ambulance will be required to transport patients to a predetermined hospital (TBD) within XX miles of the XXXX station. Replace ambulance on site for coverage within one (1) hour of departure of the first ambulance when transport is required as directed by the CO and COR through the onsite IMT. The contractor must notify the CO when 75% of the funding is remaining on the Contract Line Item Number (CLIN) for the replacement ambulances.
- 2.3.3 Transit destination site solely determined by the government through the CO and COR.

- 2.3.4 Furnish all labor, management, travel, supplies, equipment, materials, and vehicles to perform the work described herein, unless otherwise specifically stated.
- 2.3.5 Comply with applicable federal, state, and local laws, regulations, and guidance; and perform all work in accordance with these requirements and any applicable agreements.
- 2.3.6 Provide a dispatch-managed standby full service transportation 24 hours a day. The Contractor shall manage dispatch requirements, transport schedules and requests for transport to ensure timely transportation.
- 2.3.7 Maintain a serviceable transportation fleet that meet DOT inspection standard, service ADA loading and unloading equipment, and appropriate safety equipment such as fire extinguishers, breakdown markers. Operators must be properly licensed in accordance with federal and state requirements, to operate in the county.
- 2.3.8 Must be license to transport to and pick up from local hospitals.
- 2.3.9 Provide courteous customer service during operations and driver or and assistant should be able to assist non-ambulatory clients in and out of vehicles, and assist into facilities if other support is not available, if required by the patient.

Name/Location	Vehicle Type	Quantity	Date/s	Start Time	End Time
Holiday Inn Express	BLS Ambulance (2-EMTs, 1-Driver)	0			
	ALS Ambulance (2-EMT-Ps, 1-Driver)	0			

2.4 Custodial Services: The Contractor shall provide house cleaning service and daily waste removal to community housing occupants at lodging locations, as noted in chat below (TO SOW Paragraph 1.2) and dispose at authorized trash sites per local laws. (PARA 19.20) Waste should be disposed of in accordance with PARA 19.13.1.

Name/Location	Total Patients	Total Rooms	Cleaning Type	Start Time	End Time
Holiday Inn Express	120	120	Daily	1100	1400
	120	120	Final	Start after patients depart	Complete NLT 2330 on final day

2.5 Biomedical Bodily Fluids Cleanup: The contractor shall provide biomedical bodily fluid removal as required. This will be added via option CLIN and funded as noted in chart below. If more incidents are need they will be added via modification.

Name/Location	Total Events Funded	Total Rooms	Cleaning Type	Remarks
Holiday Inn Express	2-Per Day	All	Biomed	As required

2.6 Laundry Services: The Contractor shall perform laundry operations for community housing occupants at lodging locations (TO SOW Paragraph 1.2) as stated in section 19.71 and noted in chart below. (PARA: 19.7). Contractor will initially provide two (2) sets of linens for all patients. All individuals may not require laundry service every day, but it should be available daily. (Wash and fold). All laundry must be returned by the evening of the day prior to the end of the period of performance.

Name/Location	Laundry Pick-Up	Number Of Patients	Cleaning Type	Remarks
Holiday Inn Express	Daily	120	Fluff-N-Fold	Pick-up and return to central location
	Final	120	Fluff-N-Fold	Must be returned by 1700 prior to departure day

2.7 Perimeter Fencing: The Contractor shall provide perimeter fencing or crowd control barriers with personnel and vehicle gates to create and maintain zones and separations as defined by the government. (PARA: 19.29.7) see chart below for locations and linear feet required.

Name/Location	Linear Feet Required
Holiday Inn Express	1,500

2.8 Biomedical Waste Removal: The Contractor shall provide routine pickup of biomedical waste items (biohazard, medical/surgical, expired and partly used pharmaceuticals) at government occupied sites or facilities and disposal of such items per Federal and state laws. Service shall include all sharps containers and red bags at designated locations. (PARA: 19.13).

Name/Location	Frequency
Holiday Inn Express	As Required

2.9 Facilities Management: The Contractor shall provide on-call Operations and Maintenance (O&M) Services such as plumbing and handy-man repairs to maximize life expectancy of government occupied sites or facilities. (PARA: 19.27).

Name/Location	Service Required (Yes/No)
Holiday Inn Express	Yes

2.10 Final/Exit Day Cleaning: Cleaning rooms and common areas will be a requirement at end of mission. Routine cleaning is required. If this changes during the task order period of performance, a modification will be issued for this change. Full final cleaning to comply with CDC guidelines after site shut down.

Name/Location	Date

Holiday Inn Express	04/05/20

2.11 **HVAC:** (reference: basic contract SOW para-19.10.2): Provide HVAC units, cabling, ducting and power generation/fueling capable of cooling/heating in accordance with industry standards. (4-tons per 400s.f.).

Name/Location	Number HVAC Units
Holiday Inn Express	0

2.12 Americans with Disabilities Act (**ADA**) compliant **Latrines, Showers and Ablution units (19.29.8/19.28.9):** Provide trailer mounted Latrines and Showers for both male and female patients (note: anticipate 50/50 gender requirement) see chart below for needs by site. Must meet OSHA minimum requirements for capacity. Facilities must provide privacy and come with internal lighting, toilet paper, paper towels, and liquid soap. Provide daily custodial cleaning services two times per day to clean and replace supplies (toilet paper etc.). Contractors must provide their own water supply and waste removal. Comply with the 2010 ADA Standards for Accessible Design to the greatest extent possible. Additional information can be found online at: https://www.ada.gov/2010ADASTandards_index.htm

2.12.1 All units shall be fully serviced once weekly, or as site capacity requires, or as directed by the COR.

2.12.2 All wastewater if generated shall be collected with vacuum trucks, transported offsite, and disposed of through legally permissible methods.

2.12.3 When available, public utilities shall be utilized pending authorization with local authorities vetted (by the local IMT) through the CO and COR.

2.12.4 Ten percent (10%) of restroom facilities must be ADA compliant.

2.12.5 The Contractor shall ensure the toilets are adequately stocked with toilet paper.

2.12.6 The Contractor shall ensure the hand wash stations remain stocked with water, hand soap and paper towels and cleanliness maintained at all times.

2.12.7 Disposal trucks shall maintain a service schedule to remove the wastewater and portable toilets from the site and transport offsite to dispose of at a permitted treatment site. Local utilities shall be used if available.

Name/Location	Hand Washing Stations	Latrines	Showers
Holiday Inn Express	10	10	0

2.13 **Light Tower with Generator:** Provide light towers (4,000 watt min) with generator to include fueling services. Quantity needed per site listed in chart below.

Name/Location	Number Light Towers
Holiday Inn Express	10

3 GOVERNMENT FURNISHED EQUIPMENT/PROPERTY

No Government furnished equipment/Property will be provided.

APPENDIX F: SAMPLE FIRE SAFETY PLAN

FIRE SAFETY INSTRUCTIONS

- Site Safety Office has implemented a 24-hour fire watch at this site
- Medical personnel and or Safety Officer (SOFR) will carry out this responsibility, and radio any issues that are identified
- Security stationed around the sire will radio any observed issues
- If a fire is confirmed via patient, the following procedures will take place:
 - Site Dispatch will call 911 and communicate over the radio that 911 has been called
 - Fire Watch will begin knocking on doors of the impacted building ([number] patient buildings and [number] administration buildings on site)
 - Front Gate Security and the Site Manager will meet the fire department and provide access
 - Below items can occur simultaneously:
 - Site Dispatch [phone number] will help to identify patients in affected building(s)
 - An “all hands on deck” will be called with the building number(s) affected
 - Personnel working inside the Q zone will assist patients to the designated primary safe zone (or another location within the Q zone as appropriate)
 - All personnel on site (with the exception of perimeter security) will stand by to support surge needs including donning personal protective equipment (PPE), then assist patients from the impacted buildings to:
 - Primary and secondary egress points that have been identified on site map
 - Conduct Personal Accountability Report (PAR) checks with Patient Accountability and personnel

APPENDIX H: SAMPLE PATIENT INSTRUCTIONS

<Name of Hotel>

Resident Information

<DATE>

During your stay, providing you with access to accurate and up-to-date information is important to us. We are providing you with the following information to assist you during your stay. We welcome the opportunity to answer any questions that you may have. There may be questions that we cannot answer, but be assured that we will diligently work with our partners to get responses to you as soon as possible. We are here to assist you during your stay. We thank you for your patience.

Important Reminders:

- We request that each of you remain in your room at all times until we finalize a plan that will allow scheduled visits outdoors.
- Should you require assistance, please contact the staff by dialing “0” on the room telephone.
- We must adhere to Center for Disease Control (CDC) requirements and <state> laws and regulations that may prevent us from meeting some requests. We apologize for the inconvenience that this may cause for you and your family, and we acknowledge the difficulties you have each been experiencing.
- Twice a day, you will be visited by someone who will obtain your temperature and ask a series of questions about how you are feeling. Please note that it is very important for us to know if you begin to feel ill while you are here. If, at any time, you begin to feel ill, please contact the front desk by dialing “0” on the room telephone.

Medical Emergencies:

If you experience a medical emergency during your stay, call the front desk by dialing “0” from your room telephone. Please provide your name and room number. We have medical personnel on site and able to respond to your needs.

Meals

Meals are provided to you at no charge and will be brought to your room. If you have any special dietary needs or requests, please contact the front desk by dialing “0” on your room telephone, and we will work to accommodate your needs.

- Breakfast will be brought to your room approximately between 7am and 8am.
- Lunch will be brought to your room approximately between 12pm and 1pm.
- Dinner will be brought to your room approximately between 5pm and 6pm.
- If you are hungry at other times, we have a limited selection of snacks and other foods for you. For more information, please call the front desk by dialing “0” from your room telephone.

Food Safety

- Store all leftover food in sealed containers and place immediately into your room refrigerator.
- Reheat all your food within 24-48 hours.
- Only reheat food one time. Reheating food multiple times increases the risk of food poisoning.
- Make sure the food is hot and thoroughly reheated before eating. If you are unsure about the food safety, do not eat it.

Laundry

- We will let you know the days and times for laundry pickup.
- Bedsheets, linens and towels.
 1. Place these items in the bag provided to you
 2. Place the bag outside your door for pickup.
 3. Clean bedsheets, linens and towels will be placed outside your door.
- Clothing
 1. Place all dirty clothes in a bag provided to you. This will be a different bag than the one for the bedsheets, linens and towels.
 2. Place this bag outside your door for pickup.
 3. When these are cleaned, dried and folded, they will be returned by placing them outside your door.

Please note that your clothes will be washed in hot water with a strong detergent to optimize environmental infection control within the site.

Trash Pickup

Please place all trash into a trash bag that will be provided to you and put the trash bag outside your room by 12:30pm. If you need trash picked up at other times, please call the front desk by dialing “0” on your room telephone.

Room Maintenance

Please help us by cleaning your room while you are staying here. We will provide cleaning supplies for you. Vacuum cleaners, in these circumstances, cause more problems than they prevent, so they will not be provided. Please try keep the floor as clean as possible.

Pharmacy

Prescription refills can be obtained by calling one of the pharmacies at:

<Local Pharmacy Contact Information>

If you request a refill from one of the pharmacies, please contact the front desk by dialing “0” from your room telephone so we can pick up your prescription refill.

If you have no refills left on your current prescription, please contact the front desk by dialing “0” from your room telephone, and we will have a medical doctor assist you.

In either event, you will need to arrange to pay for the medications.

Telephone

People can telephone you by calling the main telephone number for the hotel, which is (xxx) xxx-xxxx and asking for you by name or your room number. To protect your privacy, we will not give out your room number to any caller, nor will we tell any caller that you are here. Callers will need to give us your name or room number in order for us to transfer the call to you.

You can make calls to people outside of the hotel by dialing 9 and then the area code and telephone number that you wish to call.

Internet Access

The hotel has w-fi. Connect to <Wi-Fi >. A password is not needed to connect to this Wi-Fi network.

Mail and Shipping

Orders can be placed through businesses and the items shipped to the following address

Your own name and room number

<Hotel Address>

Remember to include your name and room number in the above address so we can bring your package to you.

Please do not order anything that will not arrive before you leave here.

Centers for Disease Control and Prevention (CDC)

For general information related to coronavirus, please refer to the CDC website:

<https://www.cdc.gov/coronavirus/2019-ncov/index.html>

Support

Are you feeling stressed, overwhelmed or depressed? Do you need to talk to someone? We are here to listen, <name> MSW LCSW can be reached by dialing the front desk "O".

SUPPLEMENT 1: ADDITIONAL GUIDANCE FOR GENERAL (NON-ACUTE) CARE ACS MODEL

There are two size options for the General (non-acute) Care ACS Model:

- 50-bed footprint
- 250-bed footprint

50-Bed Footprint

Medical Staffing for 50-bed footprint	24 hours
Physician	2
Advanced providers (PA / NP)	4
Patient Care Providers (Combination of Nurses / Intermediate Care Technicians / EMTs / Paramedics)	20
Total	26

Note on Personal Protective Equipment

Based on the current COVID-19 situation and availability of PPE, CDC has specific recommendations PPE use. Please refer to current CDC guidance to ensure that all staff (e.g., security, support staff, logistics, medical providers) caring for patients with COVID-19 have appropriate PPE. PPE is a component of an overall infection prevention and control strategy that includes administrative and environmental controls in addition to hand hygiene, PPE and other measures to ensure safe provision of care and limiting the risk of nosocomial spread of infection. Please refer to CDC current guidance for infection prevention and control strategies.

It is recommended that each site measure amount of PPE at the beginning and end of each day and monitor the burn rate of PPE on a daily basis. The online [CDC Personal Protective Equipment \(PPE\) Burn Rate Calculator](#) is a spreadsheet-based model that provides information for healthcare facilities to plan and optimize the use of PPE for response to coronavirus disease 2019 (COVID-19). This tool can also be used for planning PPE use outside the context of COVID-19, where PPE shortages may also occur due to supply chain issues related to the COVID-19 response (e.g. manufacturing facilities).

Based on previous experience the table below is a reference for the potential burn rate of PPE for a General (non-acute) Care 50-bed site for 10 days.

Item	Qty	Unit of measure
XL Exam Gloves 14-680C	3000	each
L Exam Gloves 14-678C	4000	each

General (non-acute) Care / 50-bed / Pharmacy Recommendations		
Item Description	Unit of Measure	Qty
Acetaminophen Infant Drops 100mg/1mL, 15mL	Each	1

Acetaminophen Oral Susp. 160mg/5mL, 120mL	Each	1
Acetaminophen Suppositories 120mg	Each	2
Acetaminophen Suppositories 325mg	Each	2
Acetaminophen Tablets 325mg	Each	80
Acetaminophen w/Codeine Tablets 300mg/30mg UD	Each	20
Acetazolamide Tablets 250mg	Each	20
Acyclovir Capsules 200mg	Each	40
Adenosine Inj. 3mg/mL, 2mL vial	Each	3
Afterbite Bee Sting	Each	1
Albendazole Tablets 200mg	Each	6
Albuterol Inhalation Solution 0.083%, 3mL ampoule	Each	20
Albuterol Metered Dose Inhaler, HFA	Each	5
Albuterol Sulfate Syrup 2mg/5mL, 480mL	Each	1
Alcohol Prep Pad	Each	40
Allopurinol Tablets 100mg	Each	20
Alteplase 50mg Vial (29 mil units)	Each	1
Amiodarone HCl Inj., 150mg/3mL vial	Each	5
Amiodarone HCl Tablets 200mg	Each	20
Amlodipine Tablets 5mg	Each	40
Amoxicillin Capsules 250mg	Each	100
Amoxicillin Oral Susp. 250mg/5mL, 150mL	Each	1
Amoxicillin/Clavulanic Oral Susp. 200mg/28.5mg/5mL, 100mL	Each	2
Amoxicillin/Clavulanic Tablets 875mg/125mg	Each	20
Amphetamine Mixed Salts Capsules XR 5mg	Each	20
Ampicillin Sodium Inj. 1gm vial	Each	2
Antacid Liquid Regular Strength 12oz.	Each	1
Antipyrine/Benzocaine Otic Solution	Each	1
Artificial Tears Ophthalmic Solution, 15mL	Each	1
Aspirin Chewable Tablets 81mg	Each	90
Aspirin Tablets 325mg	Each	100
Atenolol Tablets 50mg	Each	20
Atropine Sulfate Inj. 0.1mg/mL, 10mL syringe	Each	2
Azithromycin Suspension 200mg/5mL, 30mL	Each	2
Azithromycin Tablets 250mg, 3 x 6's	Each	2
Bacitracin Ointment 0.9gm, UD	Each	30
Baclofen Tablets 10mg	Each	20
Beclomethasone Dipropionate Inhaler 40mcg, 8.7gm	Each	5
Benzoin Compound Tincture, 120mL	Each	1
Benzotropine Mesylate 1mg/mL, 2mL ampoule	Each	2
Benzotropine Mesylate Tablets 1mg	Each	20
Bisacodyl Suppositories 10mg	Each	24

Bisacodyl Tablets 5mg	Each	20
Bismuth Subsalicylate Tablets 262mg UD	Each	20
Bottle, Plastic, Amber, Liquid, 120mL	Each	20
Brimonidine Tarate Ophth. Sol. 0.2%, 5mL	Each	1
Brinzolamide Ophthalmic Suspension 1%, 10mL	Each	1
Brush, Cylinder Cleaning, Medium	Each	1

Bupropion HCl XR Tablets 150mg	Each	20
Calamine Lotion, Phenolated, 6 oz.	Each	1
Calcium Carbonate Chewable Tablets 500mg	Each	60
Calcium Chloride Inj. 10% (100mg/mL), 10mL syringe	Each	2
Carbamazepine Chew Tablets 100mg	Each	20
Carbamazepine Tablets 200mg	Each	40
Carbidopa/Levodopa Tablets 25mg/250mg	Each	20
Carpusject Holder	Each	1
Carvedilol Tablets 12.5mg	Each	20
Cefazolin Sodium Inj. 1gm vial	Each	5
Ceftriaxone Sodium Inj. 1gm vial	Each	4
Cephalexin Capsules 500mg	Each	80
Cephalexin Oral Susp. 250mg/5mL, 200mL	Each	1
Cetirizine HCl Syrup 1mg/1mL, 120mL	Each	1
Charcoal, Activated with Sorbitol, 240mL	Each	1
Ciprofloxacin HCl Ophth. Sol. 0.3% (3.5mg/mL), 5mL	Each	1
Ciprofloxacin Tablets 500mg	Each	80
Citalopram Tablets 10mg	Each	20
Clindamycin HCl Capsules 150mg	Each	40
Clindamycin Phosphate Inj. 150mg/mL, 4mL vial	Each	5
Clonazepam Tablets 0.5mg UD	Each	20
Clonidine HCl Tablets 0.1mg	Each	40
Clopidogrel Bisulfate Tablets 75mg	Each	40
Condom, Lubricated	Each	5
Conjugated Estrogens Tablets 0.625mg	Each	20
Counting Tray & Spatula	Each	2
Cyanocobalamin Injection 1000mcg/mL, 1mL vial	Each	5
Cyclobenzaprine HCl Tablets 10mg	Each	40
Cyclopentolate HCl Ophthalmic Solution 1%, 15 mL	Each	1
Dexamethasone Sodium Phosphate Inj. 4mg/mL, 5mL vial	Each	5
Dextrose 5% & Sodium Chloride 0.45% Inj., 1000mL IV bag	Each	5
Dextrose 5% & Sodium Chloride 0.9% Inj., 1000mL IV bag	Each	5
Dextrose Inj. 5%, 50mL IV bag	Each	20
Dextrose Inj. 50%, 50mL syringe	Each	4

Prescription Blanks, 100/pad	Each	200
Diaper Rash Ointment, 30gm	Each	1
Diazepam Inj. 5mg/mL, 2mL Carpuject	Each	2
Diazepam Tablets 5mg UD	Each	20
Dibucaine Ointment 1%, 30gm	Each	1
Diclofenac Sodium Ophthalmic Solution 0.1%, 5mL	Each	1
Digoxin Inj. 0.25mg/mL, 2mL ampoule	Each	2
Digoxin Tablets 0.125mg	Each	20
Diltiazem HCl Inj. 5mg/mL, 5mL vial	Each	2
Diltiazem HCl IR Tablets 60mg	Each	20
Diltiazem HCl XR Capsules 120mg	Each	20
Diphenhydramine Caplets 25mg	Each	60
Diphenhydramine Elixir 12.5mg/5mL, 120mL	Each	1
Diphenhydramine HCl Inj. 50mg/mL, 1mL vial	Each	5
Divalproex Sodium DR Tablets 250mg	Each	20
Dobutamine HCl Inj. 12.5mg/mL, 20mL vial	Each	2
Dopamine HCl Inj. 40mg/mL, 10mL vial	Each	5
Doxycycline Hyclate Tablets/Capsules 100mg	Each	20
Enalapril Inj. 1.25mg/mL, 2mL vial	Each	2
Enoxaparin Inj. 40mg/0.4mL syringe	Each	2
Epinephrine Auto Injector 0.3mg	Each	2
Epinephrine Auto Injector, Jr, 0.15mg	Each	2
Epinephrine Inj. 1:1,000 (1mg/mL), 30mL vial	Each	1
Epinephrine Inj. 1:10,000 (0.1mg/mL), 10mL syringe	Each	4
Erythromycin DR Tablets, Enteric Coated, 250mg	Each	20
Erythromycin Ophth. Oint.0.5% (5mg/gm), 3.5gm Tube	Each	3
Ethambutol HCl Tablets 400mg	Each	20
Etomidate HCl Inj. 2mg/mL, 20mL vial	Each	4
Eugenol 1/8 oz	Each	1
Famotidine Tablets 20mg	Each	40
Fentanyl Citrate Inj. 50mcg/mL, 2mL vial	Each	1
Ferrous Gluconate Tablets 324mg	Each	20
Fluconazole Tablets 200mg	Each	20
Flumazenil Inj. 0.1mL/mL, 10mL vial	Each	1
Flunisolide Nasal Spray 29mcg/spray, 25mL	Each	1
Fluocinolone Acetonide Cream 0.025%, 15gm	Each	1
Fluorescein Sodium Ophthalmic Strips, Sterile	Each	20
Fluoxetine Capsules 20mg	Each	40
Fluticasone Propionate HFA MDI 220mcg/Puff	Each	1
Fluticasone Propionate HFA MDI 44mcg/Puff	Each	1
Folic Acid Tablets 1mg	Each	20

Formula, Infant, 60/40 Powder, 400gm	Each	1
Formula, Infant, Soy and Iron Powder, 366gm	Each	1
Fosphenytoin Sodium Inj., 50mg/mL, 2mL vial	Each	5
Furosemide Inj. 10mg/mL, 10mL vial	Each	5
Furosemide Tablets 40mg	Each	20
Gabapentin Capsules 100mg	Each	20
Gabapentin Capsules 300mg	Each	40
Gentamicin Ophthalmic Solution 3% (3mg/mL), 5mL	Each	1
Glipizide Tablets 5mg	Each	40
Glucagon for Inj. 1mg w/1mL water	Each	1
Glucose Tablets	Each	10
Glyburide Tablets 5mg	Each	20
Graduated Cylinder, 125mL	Each	1
Graduated Cylinder, 30mL	Each	1
Guaifenesin AC Syrup 100mg-10mg/5mL 120mL	Each	1
Guaifenesin DM Syrup, 120mL	Each	2
Guaifenesin Syrup, 120mL	Each	2
Haloperidol Lactate Inj. 5mg/mL, 1mL vial	Each	5
Haloperidol Tablets 1mg	Each	20
Heparin Lock Flush Kit, 100 units/mL, 1mL vial	Each	5
Heparin Sodium Inj. 1000 units/mL, 10mL vial	Each	5
Hydrochlorothiazide Tablets 25mg	Each	40
Hydrocodone Bitartrate/APAP Tablets 5mg/300mg	Each	60
Hydrocortisone Acetate Suppository, 25mg	Each	5
Hydrocortisone Cream 1%, 30gm	Each	2
Hydrocortisone Sod. Succ. Inj. 100mg/2mL vial	Each	1
Hydromorphone Inj. 1mg/mL Carpuject	Each	6
Ibuprofen Oral Drops 15mL	Each	1
Ibuprofen Oral Susp. 100mg/5mL, 120mL	Each	1
Ibuprofen Tablets 400mg	Each	120
Ibuprofen Tablets 600mg	Each	80
Inhalation Chamber Spacer for MDI	Each	2
Inhalation Chamber with Mask, size Medium	Each	1

Label, Take With Water Only, 1000/box	Each	1
Label, Vaginal Use Only, 1000/box	Each	1
Labels, Prescription, DHHS	Each	1
Lactated Ringer's Inj. 1000mL IV bag	Each	5
Lamotrigine Tablets 100mg	Each	20
Latanoprost Ophthalmic Solution 0.005%, 2.5mL	Each	1
Levofloxacin Tablets 500mg	Each	40
Levonorgestrel/Ethinyl Estradiol Tablets 0.15mg/0.03mg	Each	40
Levothyroxine Sodium Tablets 0.05 mg (50mcg)	Each	20
Levothyroxine Sodium Tablets 0.1 mg (100mcg)	Each	20
Lidocaine HCl 1% w/Epinephrine Inj., 10mL vial	Each	5
Lidocaine HCl Inj. 1%, 20mL vial	Each	5
Lidocaine HCl Inj. 1%, 5mL syringe	Each	2
Lidocaine Topical Solution 4%, 50mL	Each	1
Lidocaine Viscous 2%, 100mL	Each	2
Lidocaine/Prilocaine Cream 2.5%/2.5%, 5gm	Each	2
Lisinopril Tablets 10mg	Each	60
Lithium Carbonate Tablets 300mg	Each	40
Loperamide HCl Capsules 2mg	Each	40
Loperamide HCl Solution 1mg/5mL, 120mL	Each	1
Loratadine Tablets 10mg	Each	20
Lorazepam Tablets 1mg UD	Each	20
Losartan Potassium Tablets 25mg	Each	36
Magnesium Sulfate Inj. 50% (500mg/mL), 10mL syringe	Each	2

Mannitol Inj. 25% (12.5gm/50mL), 50mL vial	Each	5
Meclizine HCl Tablets 25mg	Each	40
Medroxyprogesterone Acetate Tablets 10mg	Each	20
Metformin HCl Tablets 500mg	Each	100
Methylergonovine Inj. 0.2mg/mL ampoule	Each	4
Methylphenidate Tablets XR 18mg	Each	20
Methylprednisolone Sodium Succinate Inj. 1000mg (1gm) vial	Each	1
Methylprednisolone Sodium Succinate Inj. 125mg/2mL vial	Each	5
Methylprednisolone Tablets 4mg dosepack	Each	105
Metoclopramide HCl Inj. 5mg/mL, 2mL vial	Each	5
Metoclopramide HCl Tablets 10mg	Each	20
Metoprolol Inj. 1mg/mL, 5mL vial	Each	2
Metoprolol Tartrate Tablets 50mg	Each	40
Metronidazole Inj. 500mg/100mL IV bag	Each	5
Metronidazole Tablets 500mg	Each	40
Miconazole Vaginal Cream 2%, 45gm	Each	2
Midazolam Inj. 5mg/mL, 2mL vial	Each	4
Moisturizing Lotion, 6oz.	Each	2
Montelukast Sodium Tablets 10mg	Each	20
Morphine Sulfate Inj. 10mg/mL, 1mL vial	Each	20
Morphine Sulfate Tablets CR 30mg UD	Each	40
Mortar and Pestle, 8oz, glass	Each	1
Mupirocin Ointment 2%, 22gm	Each	1
Naloxone HCl Inj. 0.4mg/mL, 1mL vial	Each	4
Naproxen Tablets 500mg	Each	40
Needle, 18G, 1.5inch	Each	1
Neomycin/PolyB/Bacitracin HC Opth Ointment, 3.5gm	Each	3
Nicardipene Inj. 40mg/200mL, IV bag	Each	1
Nifedipine SA Tablets 30mg	Each	20
Nitrofurantoin Monohydrate Capsules 100mg	Each	40
Nitroglycerin Inj. 5mg/mL, 10mL vial	Each	5
Nitroglycerin Ointment 2%, 30gm	Each	1
Nitroglycerin Sublingual Tablets 0.4mg (25 count)	Each	2
Nitroglycerin Transdermal System 0.2mg/hr Patch	Each	6
Nortriptyline HCl Capsules 25mg	Each	20
Nutritional Supplement, Glucose Control (Boost), 8oz.	Each	6
Nutritional Supplement, Powder, Vanilla (Ensure), 14oz.	Each	2
Nystatin Cream 100,000units/gm, 15gm	Each	2
Nystatin Oral Susp. 100,000units/mL, 60mL	Each	1
Olanzapine Oral Disintegrating Tablets 5mg	Each	6
Olanzapine Tablets 5mg	Each	20

Omeprazole Capsule DR 20mg	Each	100
Ondansetron Inj. 2mg/mL, 2mL vial	Each	5
One Touch Ultra Control Solution	Each	2
One Touch ULTRA Test Strips, 50 strips	Each	2
Ophthalmic Irrigating Solution 120mL	Each	2
Oral Electrolyte Solution 33.8oz	Each	2
Oxybutynin HCl Tablets 5mg	Each	20
Oxycodone/Acetaminophen Tablets 5mg/325mg UD	Each	60
Oxymetazoline Nasal Spray 0.05%, 15mL	Each	5
Oxytocin Inj. 10units/mL, 1mL vial	Each	5
Pantoprazole Inj. 40mg/mL vial	Each	2
Penicillin G for Inj., 5 mill units vial	Each	2
Permethrin Cream 5%, 60gm	Each	3
Permethrin Topical Lotion 1% 60mL	Each	3
Petrolatum Jelly, 5gm UD	Each	144
Phenaphtazine Paper	Each	1
Phenobarbital Elixir 20mg/5mL, 473mL	Each	1
Phenobarbital Tablets 32.4mg UD	Each	20
Phenytoin Sodium Capsules ER 100mg	Each	40
Phenytoin Sodium Inj. 50mg/mL, 5mL vial	Each	5
Phenytoin Sodium Oral Susp. 125mg/5mL, 237mL	Each	1
Phytonadione Tablets 5mg (Vitamin K)	Each	20
Pioglitazone Tablets 15mg	Each	20
Piperacillin Sodium/Tazobactam Sodium Inj. 3.375mg vial	Each	2
Potassium Chloride ER Tablets 10mEq (750mg)	Each	20
Potassium Chloride Inj. 2mEq/mL, 10mL vial	Each	5
Prednisolone Acetate Ophth. Susp. 0.12%, 5ml	Each	1
Prednisolone Syrup, 15mg/5mL, 240mL	Each	1
Prednisone Tablets 20mg	Each	40
Prednisone Tablets 5mg	Each	40
Prenatal Vitamins	Each	20
Prochlorperazine Inj. 5mg/mL, 2mL vial	Each	4
Prochlorperazine Maleate Tablets 10mg	Each	20
Prochlorperazine Suppository 25mg	Each	5
Promethazine HCl Inj. 25mg/mL, 1mL vial	Each	5
Promethazine Suppositories 25mg	Each	3
Promethazine Suppositories, Pediatric 12.5mg	Each	3
Propofol Inj. 10mg/mL, 100mL vial	Each	2
Propranolol HCl Inj. 1mg/mL vial	Each	2
Protamine Sulfate 10mg/mL, 5mL vial	Each	5
Pyrazinamide Tablets 500mg	Each	20

Pyridoxine HCl Tablets 50mg	Each	20
Quetiapine Fumerate Tablets 25mg	Each	20
Racpinephrine Inhalation Solution 0.5mL ampoule	Each	6
Ranitidine HCl Inj. 25mg/mL, 2mL vial	Each	2
Refrigerator, Portable (60 Liter)	Each	1
Rifampin Capsules 300mg	Each	20
Risperidone Tablets 1mg	Each	30
Saline Nasal Spray, 45mL	Each	3
Sennosides Tablets 8.6mg	Each	20
Sharps Container, w/Needle Remover, 1 Quart	Each	1
Silver Sulfadiazine Cream 1%, 50gm	Each	3
Simvastatin Tablets 40mg	Each	20
Sodium Bicarbonate Inj. 8.4% (50mEq/50mL) 50mL syringe	Each	2
Sodium Chloride Inhalation Solution 0.9%, 3mL ampoule	Each	20
Sodium Chloride Inj. 0.9%, 1000mL IV bag	Each	20
Sodium Chloride Inj. 0.9%, 250mL IV bag	Each	5
Sodium Chloride Inj. 0.9%, 500mL IV bag	Each	20
Sodium Chloride Inj. 0.9%, 50mL IV bag	Each	16
Sodium Chloride Inj. 0.9%, Bacteriostatic, 30mL vial	Each	5
Sodium Chloride Irrigation 0.9%, 1000mL	Each	7
Sodium Phosphate Rectal Enema, USP	Each	3
Sodium Polystyrene Sulfonate Suspension 15gm/60mL, 473mL	Each	1
Spironolactone Tablets 25mg	Each	40
Succinylcholine Chloride Inj. 20mg/mL, 10mL vial	Each	1
Sulfacetamide Sodium Ophthalmic Solution 10%, 15mL	Each	2
Sulfamethox/Trimethoprim Oral Susp. 200mg/40mg/5mL, 473mL	Each	1
Sulfamethoxazole/Trimethoprim DS Tablets 800mg/160mg	Each	40
Sulfasalazine DR Tablets, Enteric Coated, 500mg	Each	20
Syringe, 3mL, LL	Each	1
Syringe, Dosing, 10mL	Each	10
Syringe, Dosing, 5mL	Each	10
Syringe/Needle, 1cc, w/28g or 29/g Needle (Safety Tip), Insulin (Latex Free)	Each	60
Tablet Cut and Crush	Each	1
Tears Naturale, Single-Use Bullets	Each	60
Terazosin HCl Capsules 1mg	Each	20
Terbutaline Sulfate Inj. 1mg/mL, 1mL vial	Each	5
Tetanus & Diphtheria Toxoids Abs Inj., Adult, 0.5mL syringe	Each	10
Tetanus & Diphtheria Toxoids Abs Inj., Peds, 1mL vial	Each	2
Tetanus Immune Globulin Inj.m, 250units/syringe	Each	1
Tetracaine Ophthalmic Solution 0.5%, 15mL	Each	1
Tetrahydrozoline HCl Ophthalmic Solution, 0.05%, 15mL	Each	5

Thermometer, Digital (For Refrigerator Monitoring)	Each	1
Thiamine HCl Inj. 100mg/mL, 2mL vial	Each	5
Throat Lozenges	Each	20
Timolol Maleate Ophthalmic Solution 0.5%, 5mL	Each	1
Tobramycin Inj. 40mg/mL, 2mL vial	Each	5
Trazodone HCl Tablets 50mg	Each	40
Triamcinolone Acetonide Cream 0.1%, 15gm	Each	2
Triple Antibiotic Ointment, 15gm	Each	2
Urine Test Strips (Multistix 10 SG), 100 strips	Each	1
Valproic Acid Capsules 250mg	Each	20
Vancomycin HCl Inj. 1gm vial	Each	2
Vecuronium Bromide Inj. 10mg/10mL vial	Each	2
Venlafaxine HCl ER Tablets/Capsules 37.5mg	Each	20
Verapamil Tablets 80mg	Each	60
Vials, Clear View, 20 dram	Each	40
Vials, Clear View, 8 dram	Each	80
Vials, Screw Lock Caps, 20 dram	Each	40
Vials, Screw Lock Caps, 8 dram	Each	80
Warfarin Sodium Tablets 1mg	Each	40
Warfarin Sodium Tablets 5mg	Each	40
Water For Inj., Sterile, 20mL vial	Each	10
Water For Irrigation, Sterile, 1000mL	Each	7
Water, Distilled, 1 gallon (for Rx compounding)	Each	2
Zinc Oxide Ointment, 28gm	Each	3
Zolmitriptan Tablets 5mg	Each	3
Zolpidem Tartrate Tablets 10mg UD	Each	20

General (non-acute) Care / 50-bed / Lab Recommendations

Note on Personal Protective Equipment

Based on the current COVID-19 situation and availability of PPE, CDC has specific recommendations PPE use. Please refer to current CDC guidance to ensure that all staff (e.g., security, support staff, logistics, medical providers) caring for patients with COVID-19 have appropriate PPE. PPE is a component of an overall infection prevention and control strategy that includes administrative and environmental controls in addition to hand hygiene, PPE and other measures to ensure safe provision of care and limiting the risk of nosocomial spread of infection. Please refer to CDC current guidance for infection prevention and control strategies.

It is recommended that each site measure amount of PPE at the beginning and end of each day and monitor the burn rate of PPE on a daily basis. The online [CDC Personal Protective Equipment \(PPE\) Burn Rate Calculator](#) is a spreadsheet-based model that provides information for healthcare facilities to plan and optimize the use of PPE for response to coronavirus disease 2019 (COVID-19). This tool can also be used for planning PPE use outside the context of COVID-19, where PPE shortages may also occur due to supply chain issues related to the COVID-19 response (e.g. manufacturing facilities).

Based on previous experience the table below is a reference for the potential burn rate of PPE for a General (non-acute) Care 50-bed site for 10 days.

Item	Qty	Unit of measure
XL Exam Gloves 14-680C	3000	each

General (non-acute) Care / 50-bed / Pharmacy Recommendations			
Item Description	Brand Name	Unit of Measure	Qty
Acetaminophen Infant Drops 100mg/1mL, 15mL	Tylenol	Each	5
Acetaminophen Oral Susp. 160mg/5mL, 120mL	Tylenol	Each	6
Acetaminophen Suppositories 120mg	Tylenol	Each	12
Acetaminophen Suppositories 325mg	Tylenol	Each	12
Acetaminophen Tablets 325mg	Tylenol	Each	400
Acetaminophen w/Codeine Tablets 300mg/30mg UD	Tylenol/Cod #3	Each	100
Acetazolamide Tablets 250mg	Diamox	Each	100
Acyclovir Capsules 200mg	Zovirax	Each	200
Adenosine Inj. 3mg/mL, 2mL vial	Adencard	Each	15
Afterbite Bee Sting	Afterbite	Each	1
Albendazole Tablets 200mg	Albenza	Each	28
Albuterol Inhalation Solution 0.083%, 3mL ampoule	Proventil	Each	100
Albuterol Metered Dose Inhaler, HFA	Proventil	Each	25
Albuterol Sulfate Syrup 2mg/5mL, 480mL	Ventolin	Each	1
Alcohol Prep Pad	Alcohol	Each	200
Allopurinol Tablets 100mg	Zyloprim	Each	100
Alteplase 50mg Vial (29 mil units)	Ateplase	Each	2
Amiodarone HCl Inj., 150mg/3mL vial	Cordarone	Each	25
Amiodarone HCl Tablets 200mg	Cordarone	Each	90
Amlodipine Tablets 5mg	Novasc	Each	180
Amoxicillin Capsules 250mg	Amoxil	Each	500
Amoxicillin Oral Susp. 250mg/5mL, 150mL	Amoxil	Each	6
Amoxicillin/Clavulanic Oral Susp. 200mg/28.5mg/5mL, 100mL	Augmentin	Each	12
Amoxicillin/Clavulanic Tablets 875mg/125mg	Augmentin	Each	100
Amphetamine Mixed Salts Capsules XR 5mg	Adderall XR	Each	100
Ampicillin Sodium Inj. 1gm vial	Ampicillin	Each	10
Antacid Liquid Regular Strength 12oz.	Maalox	Each	6
Antipyrine/Benzocaine Otic Solution	Auralgan	Each	6
Artificial Tears Ophthalmic Solution, 15mL	Liquifilm	Each	6
Aspirin Chewable Tablets 81mg	Aspirin	Each	432
Aspirin Tablets 325mg	Aspirin	Each	500

Atenolol Tablets 50mg	Tenormin	Each	100
Atropine Sulfate Inj. 0.1mg/mL, 10mL syringe	Atropine	Each	10
Azithromycin Suspension 200mg/5mL, 30mL	Zithromax	Each	8
Azithromycin Tablets 250mg, 3 x 6's	Z-Pak	Each	12
Bacitracin Ointment 0.9gm, UD	Bacitracin	Each	144
Baclofen Tablets 10mg	Lioresal	Each	100
Beclomethasone Dipropionate Inhaler 40mcg, 8.7gm	Qvar	Each	5
Benzoin Compound Tincture, 120mL	Benzoin	Each	1
Benzotropine Mesylate 1mg/mL, 2mL ampoule	Cogentin	Each	5
Benzotropine Mesylate Tablets 1mg	Cogentin	Each	100
Bisacodyl Suppositories 10mg	Dulcolax	Each	24
Bisacodyl Tablets 5mg	Ducolax	Each	100
Bismuth Subsalicylate Tablets 262mg UD	Pepto Bismol	Each	90
Bottle, Plastic, Amber, Liquid, 120mL	Bottle	Each	100
Brimonidine Tarate Ophth. Sol. 0.2%, 5mL	Alphagan P	Each	5
Brinzolamide Ophthalmic Suspension 1%, 10mL	Azopt	Each	5
Brush, Cylinder Cleaning, Medium	Cylinder Brush	Each	1
Bupivacaine HCl Inj. 0.5%, 30mL vial	Marcaine	Each	25
Bupropion HCl XR Tablets 150mg	Wellbutrin XR	Each	60
Calamine Lotion, Phenolated, 6 oz.	Calamine	Each	6
Calcium Carbonate Chewable Tablets 500mg	Tums	Each	300
Calcium Chloride Inj. 10% (100mg/mL), 10mL syringe	Calcium Chloride	Each	10
Carbamazepine Chew Tablets 100mg	Tegretol	Each	100
Carbamazepine Tablets 200mg	Tegretol	Each	200
Carbidopa/Levodopa Tablets 25mg/250mg	Sinemet	Each	100
Carpujet Holder	Carpujet Holder	Each	2
Carvedilol Tablets 12.5mg	Coreg	Each	100
Cefazolin Sodium Inj. 1gm vial	Ancef	Each	25
Ceftriaxone Sodium Inj. 1gm vial	Rocephin	Each	20
Cephalexin Capsules 500mg	Keflex	Each	400
Cephalexin Oral Susp. 250mg/5mL, 200mL	Keflex	Each	2
Cetirizine HCl Syrup 1mg/1mL, 120mL	Zyrtec	Each	2
Charcoal, Activated with Sorbitol, 240mL	Charcoal	Each	3
Ciprofloxacin HCl Ophth. Sol. 0.3% (3.5mg/mL), 5mL	Ciloxan	Each	5
Ciprofloxacin Tablets 500mg	Cipro	Each	400
Citalopram Tablets 10mg	Celexa	Each	100
Clindamycin HCl Capsules 150mg	Cleocin	Each	200
Clindamycin Phosphate Inj. 150mg/mL, 4mL vial	Cleocin	Each	25
Clonazepam Tablets 0.5mg UD	Klonopin	Each	100
Clonidine HCl Tablets 0.1mg	Catapres	Each	200
Clopidogrel Bisulfate Tablets 75mg	Plavix	Each	180

Condom, Lubricated	Trojan	Each	24
Conjugated Estrogens Tablets 0.625mg	Premarin	Each	100
Counting Tray & Spatula	Counting Tray	Each	5
Cyanocobalamin Injection 1000mcg/mL, 1mL vial	Vitamin B-12	Each	25
Cyclobenzaprine HCl Tablets 10mg	Flexeril	Each	200
Cyclopentolate HCl Ophthalmic Solution 1%, 15 mL	Cyclogel	Each	2
Dexamethasone Sodium Phosphate Inj. 4mg/mL, 5mL vial	Decadron	Each	25
Dextrose 5% & Sodium Chloride 0.45% Inj., 1000mL IV bag	Dextrose/Na Cl	Each	24
Dextrose 5% & Sodium Chloride 0.9% Inj., 1000mL IV bag	Dextrose/Na Cl	Each	24
Dextrose Inj. 5%, 50mL IV bag	Dextrose	Each	80
Dextrose Inj. 50%, 50mL syringe	Dextrose	Each	20
Prescription Blanks, 100/pad	Rx Pad	Each	1000
Diaper Rash Ointment, 30gm	Desitin	Each	6
Diazepam Inj. 5mg/mL, 2mL Carpuject	Valium	Each	10
Diazepam Tablets 5mg UD	Valium	Each	100
Dibucaine Ointment 1%, 30gm	Nupercainal	Each	5
Diclofenac Sodium Ophthalmic Solution 0.1%, 5mL	Voltaren	Each	2
Digoxin Inj. 0.25mg/mL, 2mL ampoule	Lanoxin	Each	10
Digoxin Tablets 0.125mg	Lanoxin	Each	100
Diltiazem HCl Inj. 5mg/mL, 5mL vial	Cardizem	Each	10
Diltiazem HCl IR Tablets 60mg	Cardizem	Each	100
Diltiazem HCl XR Capsules 120mg	Cardizem SR	Each	90
Diphenhydramine Caplets 25mg	Benadryl	Each	300
Diphenhydramine Elixir 12.5mg/5mL, 120mL	Benadryl	Each	4
Diphenhydramine HCl Inj. 50mg/mL, 1mL vial	Benadryl	Each	25
Divalproex Sodium DR Tablets 250mg	Depakote	Each	100
Dobutamine HCl Inj. 12.5mg/mL, 20mL vial	Dobutamine	Each	10
Dopamine HCl Inj. 40mg/mL, 10mL vial	Intropin	Each	25
Doxycycline Hyclate Tablets/Capsules 100mg	Vibramycin	Each	100
Enalapril Inj. 1.25mg/mL, 2mL vial	Vasotec	Each	10
Enoxaparin Inj. 40mg/0.4mL syringe	Lovenox	Each	10
Epinephrine Auto Injector 0.3mg	Epi-Pen Adult	Each	4
Epinephrine Auto Injector, Jr, 0.15mg	Epi-Pen Jr	Each	4
Epinephrine Inj. 1:1,000 (1mg/mL), 30mL vial	Adrenalin	Each	1
Epinephrine Inj. 1:10,000 (0.1mg/mL), 10mL syringe	Adrenalin	Each	20
Erythromycin DR Tablets, Enteric Coated, 250mg	Ery-tab	Each	100
Erythromycin Ophth. Oint.0.5% (5mg/gm), 3.5gm Tube	Ilotycin	Each	6
Ethambutol HCl Tablets 400mg	Myambutol	Each	100
Etomidate HCl Inj. 2mg/mL, 20mL vial	Amidate	Each	20
Eugenol 1/8 oz	Eugenol	Each	1
Famotidine Tablets 20mg	Pepcid	Each	200

Fentanyl Citrate Inj. 50mcg/mL, 2mL vial	Sublimaze	Each	5
Ferrous Gluconate Tablets 324mg	Iron Supplement	Each	100
Fluconazole Tablets 200mg	Diflucan	Each	100
Flumazenil Inj. 0.1mL/mL, 10mL vial	Romazicon	Each	1
Flunisolide Nasal Spray 29mcg/spray, 25mL	Nasarel	Each	6
Fluocinolone Acetonide Cream 0.025%, 15gm	Synalar	Each	6
Fluorescein Sodium Ophthalmic Strips, Sterile	Fluorescein	Each	100
Fluoxetine Capsules 20mg	Prozac	Each	200
Fluticasone Propionate HFA MDI 220mcg/Puff	Flovent	Each	6
Fluticasone Propionate HFA MDI 44mcg/Puff	Flovent	Each	6
Folic Acid Tablets 1mg	Folic Acid	Each	100
Formula, Infant, 60/40 Powder, 400gm	Similac PM 60/40	Each	6
Formula, Infant, Soy and Iron Powder, 366gm	Similac Soy Isomil w/ Iron	Each	6
Fosphenytoin Sodium Inj., 50mg/mL, 2mL vial	Cerebyx	Each	25
Furosemide Inj. 10mg/mL, 10mL vial	Lasix	Each	25
Furosemide Tablets 40mg	Lasix	Each	100
Gabapentin Capsules 100mg	Neurontin	Each	100
Gabapentin Capsules 300mg	Neurontin	Each	200
Gentamicin Ophthalmic Solution 3% (3mg/mL), 5mL	Garamycin	Each	6
Glipizide Tablets 5mg	Glucotrol	Each	200
Glucagon for Inj. 1mg w/1mL water	Glucagon	Each	2
Glucose Tablets	Glucose	Each	50
Glyburide Tablets 5mg	Micronase	Each	100
Graduated Cylinder, 125mL	Graduated Cylinder	Each	1
Graduated Cylinder, 30mL	Graduated Cylinder	Each	1
Guaifenesin AC Syrup 100mg-10mg/5mL 120mL	Robitussin AC	Each	4
Guaifenesin DM Syrup, 120mL	Robitussin DM	Each	12
Guaifenesin Syrup, 120mL	Robitussin Exp.	Each	12
Haloperidol Lactate Inj. 5mg/mL, 1mL vial	Haldol	Each	25
Haloperidol Tablets 1mg	Haldol	Each	100
Heparin Lock Flush Kit, 100 units/mL, 1mL vial	Heparin	Each	25
Heparin Sodium Inj. 1000 units/mL, 10mL vial	Heparin	Each	25
Hydrochlorothiazide Tablets 25mg	HydroDiuril	Each	200
Hydrocodone Bitartrate/APAP Tablets 5mg/300mg	Vicodin (new formulation)	Each	300
Hydrocortisone Acetate Suppository, 25mg	Anusol-HC	Each	24
Hydrocortisone Cream 1%, 30gm	Hytone	Each	12
Hydrocortisone Sod. Succ. Inj. 100mg/2mL vial	Solu-Cortef	Each	2
Hydromorphone Inj. 1mg/mL Carpuject	Dilaudid	Each	30
Ibuprofen Oral Drops 15mL	Motrin	Each	6
Ibuprofen Oral Susp. 100mg/5mL, 120mL	Motrin	Each	6
Ibuprofen Tablets 400mg	Motrin	Each	600

Ibuprofen Tablets 600mg	Motrin	Each	400
Inhalation Chamber Spacer for MDI	Aerochamber	Each	12
Inhalation Chamber with Mask, size Medium	Aerochamber	Each	2
Insulin Human and Insulin Isophane Susp. 70/30, 10mL vial	Humulin 70/30	Each	5
Insulin NPH 100 units/mL, 10mL vial	Humulin / Novolin	Each	10
Insulin Regular 100 units/mL, 10mL vial	Humulin / Novolin	Each	10
Insulin, Glargine 10mL	Lantus	Each	10

Sample Statement of Work

Task Order XXX

RFR XXX

Medical and Support Personnel

[Location]

Statement of Work

1.0 Scope

The Contractor shall provide experienced medical and support personnel to provide round the clock medical service at a quarantine site between XX/XX/XXXX and XX/XX/XXXX.

2.0 Tasks

2.0 The Contractor shall provide contracted medical staff to support the alternative care site at Fairfield Inn. There will be three (3) teams covering three (3) eight hour shifts. Nine (9) personnel per shift for a total of twenty seven (27) personnel.

The composition of each of the teams (X 3) will be as follows: 1 Physician (emergency med or internal meds), 1 Mid-Level (PA/NP), 2 Nurses, 2 Paramedics, 1 Safety Officer (with infection control training), 2 Logistics

2.1 All contract personnel must be on site no later than [Month, Day, and Year] and be ready to begin operations at 08:00 pacific coast time. The contractor should arrange for three shifts of eight (8) hours each and they shall be organized based on contractor preference and arranged in such a manner as to reduce the stress on providers and allow for the safest possible situation for everyone.

2.2 This is an assisted living site that has a high volume of patients that have tested positive for the COVID19 so All PPE should meet CDC guidance.

2.3 The Contractor shall provide all personnel and equipment.

2.4 Contractor shall provision its own transportation, housing, per diem and wrap around services, per industry standards, for mission requirements and for personnel support.

2.5 The address of the location is: XXX

2.6 Contractor must be able to communicate with the local public health contingent

during the operations that will be located at XXX.

2.7 Contractor will report daily operational status to the COR and point of contact (POC) that is inclusive of patient information (count, conditions, etc. (final reporting information will be provided)).

2.8 POC is XXXXX

3.0 Period of Performance

3.1 The period of performance is March 14, 2020 08:00 PDT through COB April 04, 2020 23:50 PDT

SUPPLEMENT 2: ADDITIONAL GUIDANCE FOR ACUTE CARE ACS MODEL

Medical Staffing for 50-bed footprint	24 hours
Physician	4
Advance Care Practitioners	4
Nurse Anesthetists	2
RN	24
Pharmacist	2
EMT-P	4
Radiology Technologist	2
Respiratory Therapist	8
Total	50

Note on Personal Protective Equipment

Based on the current COVID-19 situation and availability of PPE, CDC has specific recommendations PPE use. Please refer to current CDC guidance to ensure that all staff (e.g., security, support staff, logistics, medical providers) caring for patients with COVID-19 have appropriate PPE. PPE is a component of an overall infection prevention and control strategy that includes administrative and environmental controls in addition to hand hygiene, PPE and other measures to ensure safe provision of care and limiting the risk of nosocomial spread of infection. Please refer to CDC current guidance for infection prevention and control strategies.

It is recommended that each site measure the amount of PPE at the beginning and end of each day and monitor the burn rate of PPE on a daily basis. The online [CDC Personal Protective Equipment \(PPE\) Burn Rate Calculator](#) is a spreadsheet-based model that provides information for healthcare facilities to plan and optimize the use of PPE for response to coronavirus disease 2019 (COVID-19). This tool can also be used for planning PPE use outside the context of COVID-19, where PPE shortages may also occur due to supply chain issues related to the COVID-19 response (e.g. manufacturing facilities).

Based on previous experience the table below is a reference for the ***potential*** burn rate of PPE for a General (non-acute) Care 50-bed site for 10 days. Each site must determine its own requirements.

SULFADIAZINE SILVER CREAM 1% TOPICAL 85GM TUBE	40	TU
SUMATRIPTAN SUCCINATE TABLETS 100MG 9TT	10	PG
TERAZOSIN HYDROCHLORIDE CAPSULES EQUIVALENT TO 1 MG 100 TABS/BT	2	BT
TERBINAFINE CREAM 1% TOPICAL 30 GRAM TUBE	24	TU
Tetanus & Diphtheria Toxoids Abs Inj., Adult, 0.5mL syringe pkg of 10	2	PG
Tetanus & Diphtheria Toxoids Abs Inj., Peds, 1mL vial pkg of 10	2	PG
TETRACAINE HYDROCHLORIDE OPHTHALMIC SOLUTION 0.5% 15 ML	10	BT
TIMOLOL MALEATE OPHTHALMIC SOLUTION USP 5ML BOTTLE WITH TIP	10	BT
TOBRAMYCIN OPHTHALMIC OINTMENT USP 3.5GM TUBE	10	TU
TRAMADOL ACETAMINIPHEN TABLETS 100S	6	BT
TRIAMCINOLONE ACETONIDE CREAM USP TOPICAL 0.1% 15 GM	24	TU
TRIAMCINOLONE ACETONIDE DENTAL PASTE USP 5GM	20	TU
VANCOMYCIN HYDROCHLORIDE STERILE USP 1GM VIAL 10 VIALS/PACKAGE	2	PG
VECURONIUM BROMIDE FOR INJECTION 10 MG 10ML VIALS 10/PKG	2	PG
VENLAFAXINE HYDROCHLORIDE CAPSULES EXTENDED RELEASE 24-HRS 90S	20	BT
VERAPAMIL HYDROCHLORIDE EXTENDED-RELEASE TABLETS USP 240MG 100S	2	BT
WARFARIN SODIUM TABLETS USP 5MG 100 TABLETS PER BOTTLE	2	BT
WATER FOR INJECTION STERILE USP VIAL WITH FLIP TOP 20 ML 25/PG	4	PG
WATER FOR IRRIGATION STERILE USP 1000ML BOTTLE 16 PER PACKAGE	6	PG
ZINC OXIDE OINTMENT USP 1 OZ (28.35 GM)	20	TU
ZOLPIDEM TARTRATE TABLETS 10 MG 100 TABLETS PER PACKAGE	4	PG

ALTERNATE CARE SITE GUIDE

The following guide is intended to be used when setting up an Alternate Care Site (ACS) in response to COVID-19. This guide should not be viewed as comprehensive and final. It should be adapted and amended to accommodate the unique circumstances of each ACS.

Identify Potential Sites

- Refer to Appendix B: Alternate Care Site Checklist

Conduct Site Assessment

- Comply with the Architectural Barriers Act and Americans with Disabilities Act (ADA)
- Should not be in the Special Flood Hazard Area (SFHA), but acknowledges that there may not be a practical location outside the floodplain
- Must be capable of being adequately secured on perimeter
- Should not have structural issues or be in a state of unsafe disrepair
- Identify location for aeromedical transport if available/needed
- Should have a fire sprinkler system or equivalent in accordance with local regulations
- Should have elevator access for patients, if the building is more than one floor
- Should have a designated, secure ambulation/exercise area for patients
- Should have a functional kitchen
- Should have bathrooms in each room
- Should have an individual HVAC in each room
- Should be otherwise vacant of patrons
- Should allow for photocopier and printer setup
- Should be able to accommodate a tent or structural barrier for ambulance arrival at entrance to protect patients' privacy from photography/drones
- Should allow for the separation of patients (PUI vs. COVID-19 positive)
- Should have a dedicated space for a 24/7 dispatch center with one dedicated phone number
- Should have area(s) for donning and doffing PPE
- Should be able to accommodate a team staging area at least 12 feet away from patients
- Should have an arrival and disinfecting/cleaning area for EMS, if EMS is not already on site
- Obtain building engineer contact information
- Walk site with building manager and engineer to understand key systems in the building and emergency procedures for each such as water, power, phone, internet for patients and fire suppressions systems
- Review with Fire Marshal fire exits, and site plan is in step with evacuation plans

- Identify the delta between what is at the site and what will be provided by the wraparound service contractor
- Develop map layout of the site with bed types, suite types, Americans with Disabilities Act compliant rooms, and adjoining rooms for family units
- Identify closed-circuit television systems that are disabled with no way to activate remotely
- Ensure cable and internet capability works on patient floors
- Understand site key system
- Obtain keys to elevators for security
- Close public bathrooms in patient areas
- Remove food in common areas
- Consideration should be given to conducting surveillance for potentially transmissible infectious diseases (e.g., Infectious diarrhea) to ensure clusters are detected early and addressed
- Medical supply storage in a secure climate-controlled environment near patient treatment area
- Refrigeration/freezer units appropriate for medication storage in secured area

Secure Funding

- Funding is secured after specific site is selected

Secure Property

- Lease site

Convert Site for Healthcare Use

- Determine extent of modifications required
- Determine what agency will make required modifications

Secure Wraparound Services

- Obtain Wraparound Service Contract
- Ensure fencing installed around perimeter to enforce the isolation/quarantine order and prevent unauthorized access to the site
- Ensure the site is secured with onsite guard force
- Establish the appropriate number of fire-compliant access points to the site depending on local regulations

- Establish a separate staging/ingress/egress point for patients and EMS
- Establish a separate ingress/egress point for staff
- Determine safe evacuation routes with designated rally point
- Establish Command Post/Administrative Area in Lobby or other suitable location.
- Delineate between Zone/Operational Area and Clean/Support Area, mark with signage
- Clearly designate Clean/Support Areas for both staff staging and PPE donning
- Clearly identify Transition Area for PPE doffing
- Clearly identify Zone/Living Quarters in individual rooms for patients
- Designate separate floors for COVID-19-positive and COVID-19-negative/unknown patients
- Conduct safe isolation practices in common areas, stairwells, and elevators
- Utilize plastic dividers to effectively demarcate and reinforce site footprint
- Establish designated media area

Staff, Equip, and Supply Site

- Determine which model will be used for ACS site: General (non-acute) Care ACS Model or Acute Care ACS Model

Operate Site

- Ensure that all onsite staff are provided with proper oversight and supervision
- Ensure that patients are under quarantine/isolation orders and release criteria is based on the most current CDC guidance
- Define roles and responsibilities of key personnel
- Develop site flow plan
- Develop site security plan
- Develop site communications plan
- Develop onsite plan for Caregivers and Family Members

Restore Site

- Maintain the site until site is deactivated or the responsibility is turned over to another appropriate authority
- Conduct standard decontamination cleaning in accordance with CDC guidelines prior to turning it back over
