Application for Review of Fire Alarm System Plans

REQUIREMENTS FOR FIRE ALARM SYSTEM PLANS REVIEW

- A completed Plans Review Application shall be completed by the plans submitter and shall be filled out in its entirety.
- Fire Alarm Plans shall be submitted in digital format (CD or USB).
- A complete set of plans shall be drawn to scale and include:
 - Architectural Layout Indicating:
 - Room Usage; All devices; Wiring diagram; and Battery calculations.
 - Fire Alarm System must be designed by:
 - Personnel who are NICET level 3 or 4 certified (a copy of NICET certification shall be provided), or an engineer.
 - Personnel who are factory trained and certified with certificate.
 - Design documents that are to be issued as guidance and direction specified by an engineer should be clearly identified and documented as such by the engineer's stamp/seal with license.

All plans being submitted to our agency for review **MUST** be accompanied by the appropriate request application. All applications can be found on our website by type of review. If this form is **NOT** received within thirty (30) days of receipt of plans, the plans submission may be discarded. If the request application is not completed, it will be returned for resubmission.

Review Fee includes **ALL** Construction Inspections, the Final Inspection, and the Occupancy Permit and will be billed after review and processing.

If you have any further questions, please contact our office at 304-558-2191.

Please submit your completed Plans Review Application and Plans to:
